CAREER SUMMARY

Final-year Computer Engineering fresher (2026) with hands-on experience in React.js, Node.js, Spring Boot, MySQL, and MongoDB. Skilled in building responsive, component-based web applications, integrating REST APIs, and developing interactive user interfaces. Familiar with ES6, AJAX, SASS, Git, and Agile development practices. Immediate joiner.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, Python, C++

Frontend: React.js (React 18, Vite), HTML5, CSS3, SASS, Responsive Web Design, Framer Motion, AJAX, Axios

Backend & DB: Spring Boot, Node.js, Express.js, REST APIs, MySQL, MongoDB, Firebase (Auth + Firestore)

Tools: Git, GitHub, GitHub Actions (CI/CD), ESLint(Basic), VS Code, Streamlit

Concepts: DSA, OOP, DBMS, OS, HTTP Flow, MVC Architecture, TDD, Agile/Scrum, Design Thinking

PROJECTS

Final Year Project: EcoFusionAI — Multimodal Biodiversity Early Warning System (Python · Streamlit · Scikit-learn · Pandas · NumPy · Plotly)

- Fused MODIS NDVI satellite data, GBIF species records, and BirdCLEF acoustic data into a unified multimodal framework for ecosystem health monitoring in the Western Ghats.
- Engineered an Eco-Stress Index (Environmental 50%, Acoustic 30%, Biodiversity 20%) after temporal alignment of datasets across 2018–2024; applied Random Forest and Linear Regression for stress classification.
- Built an interactive Streamlit dashboard visualising biodiversity trends, NDVI health, and ML insights for researchers and decision makers.

Task Manager Application (Full Stack) (Spring Boot · React.js · MySQL · REST APIs · MVC)

- Built full-stack Task Manager with CRUD operations using MVC architecture; designed REST APIs with Spring Boot and integrated MySQL via JPA/Hibernate with a React.js + Axios frontend.
- Implemented responsive UI with real-time updates; handled end-to-end HTTP request flow from browser to server.

DSA Kids Game — Gamified Learning Platform (React 18 · Vite · Framer Motion · Firebase · GitHub Actions)

- Developed gamified platform teaching DSA through real-time animations of stack/queue operations; used component-based React architecture with CSS3 and Framer Motion for cross-device responsive design.
- Integrated Firebase Auth + Firestore for progress tracking with offline fallback; deployed via GitHub Actions CI/CD pipeline.

WORK EXPERIENCE

Web Development Intern — UpToSkills (Remote)

Feb 2025 – May 2025

- Built responsive React.js UI components using ES6, hooks, and reusable design patterns; integrated REST APIs via Axios/AJAX within an Agile 10-member team across sprint cycles.

Artificial Intelligence Intern — Edunet Foundation (Remote)

Nov 2024 – Dec 2024

- Implemented Python-based ML models; performed EDA and data preprocessing using Pandas, NumPy, and Seaborn.

EDUCATION

B.E. Computer Engineering — Alard College of Engineering & Management, Pune (SPPU) CGPA: 7.47 (till Semester 7) | Expected Graduation: 2026

HSC (12th) — S.N.B.P Jr College, Pune | 72.67% | 2022

CERTIFICATIONS & ACHIEVEMENTS

- Data Analytics Experiential Learning (NOS Aligned) — Nasscom | March 2026
- Software Engineering Job Simulation — Accenture Nordics (Forage)
- Technology Consulting Job Simulation — Deloitte Australia (Forage)
- GenAI Exchange Hackathon Participant — Hackskills
