CAREER OBJECTIVE

Final-year Computer Engineering student (Expected Graduation: 2026) with hands-on experience in Python, SQL, data processing, machine learning, and dashboard development. Skilled in building data pipelines, transforming datasets, and generating business insights through analytics and visualization. Seeking opportunities in Data Engineering and Analytics to contribute to scalable data-driven solutions.

TECHNICAL SKILLS

Analytics: EDA, Data Cleaning, Statistical Analysis, A/B Testing, Campaign Performance Analysis, Machine Learning

Data Engineering: ETL Concepts, Data Transformation, Data Pipeline Fundamentals, Data Warehousing Basics

BI & Reporting: Power BI, Looker (Dashboard), Excel, Power Query

Languages: Python, SQL

Libraries: Pandas, Matplotlib, scikit-learn

Databases: MySQL, MongoDB

Cloud & Tools: GCP BigQuery (familiar), Jupyter, Git, GitHub, VS Code, Streamlit

WORK EXPERIENCE / INTERNSHIP

Web Development Intern | UpToSkills (Remote) | Feb 2025 – May 2025

- Maintained structured documentation of workflows and data requirements, ensuring accurate knowledge transfer across a 10-member cross-functional team.
- Communicated project deliverables and technical updates to stakeholders in an agile workflow, gaining experience in iterative, feedback-driven delivery.

Artificial Intelligence Intern | Edunet Foundation (Remote) | Nov 2024 – Dec 2024

- Completed a structured program on Python and machine learning, building foundational skills for data preparation, EDA, and analytical pipelines.

PROJECTS

EcoFusionAI – Multimodal Early Warning System for Biodiversity Monitoring | Python | Machine Learning | Deep Learning | Data Processing

- Developed an AI-powered biodiversity monitoring system using multimodal environmental data.
- Built machine learning pipelines for data preprocessing, feature extraction, and predictive analysis.
- Processed large datasets from multiple sources to identify biodiversity risks and generate early-warning insights.
- Improved environmental monitoring through automated data analysis and intelligent prediction models.

Sales Campaign Analytics Dashboard | Power BI | Excel | SQL

- Designed a dynamic Power BI dashboard tracking KPIs for revenue, profit, regional performance, and campaign effectiveness; identified monthly trends and top-performing segments.
- Performed exploratory data analysis and statistical trend evaluation across regional segments to identify performance patterns and support data-driven decision-making.
- Translated campaign performance data into actionable insights for business stakeholders, highlighting optimization opportunities and recommending improvements.

Resume Classification System | Python | scikit-learn | NLP | Streamlit

- Built an end-to-end ML pipeline classifying resumes into job profiles using Random Forest on TF-IDF features; evaluated 8 models (SVM, XGBoost, Logistic Regression, Naive Bayes) to select the best performer.
- Deployed an interactive Streamlit app for resume upload, job profile prediction, skill extraction (spaCy), and visual category distribution charts.

EDUCATION

B.E. Computer Engineering — Alard College of Engineering & Management, Pune (SPPU) Expected Graduation: 2026 | CGPA: 7.47/

CERTIFICATIONS

- GenAI-Powered Data Analytics Simulation — Tata Group, Forage
- Data Analytics Simulation — Deloitte, Forage
- Data Visualization (152 hrs, Grade A) — Anudip Foundation
- Data Analytics Experiential Learning (Aligned to NOS) — Nasscom | March 2026
